

Beginning January 1, 2020 Pope Family Dentistry will no longer be a PPO for Delta Dental. HOWEVER, will be joining the Delta Premier network.

What does Delta Premier mean for a patient who has Delta Dental?

You will still get a discounted fee, just not as much of a discounted fee as with a PPO.

You will get a % of coverage, just not as high of a coverage %. (Example: 80% coverage of a procedure with PPO, may be 60% coverage with Premier).

Your yearly deductible will likely increase from \$50 to \$100.

For the Delta patient who generally only comes to the dentist twice per year for cleanings, x-rays, and exams, it is estimated that this patient would pay between \$20-30 per appointment more than they were with a PPO dentist, which would mean \$40-60 per year per individual.
